Welcome to

Glutton®

An innovative concept
An efficient production facility
International in scope

Glutton® is a major player in street cleaning, and we design, manufacture and market **the most reliable electric urban vacuum cleaner in the world.**

The Glutton® urban waste vacuum cleaner is electric, environmentally friendly and economical, revolutionising day-to-day street cleaning in more than **6000 cities in 70 countries** and putting a smile on the face of local authority officials, workers and residents alike.

Our brand-new, **7000m2, ultra-modern production facility** is in Namur in Belgium. Our customers throughout the world prize our quality and expertise.

Today, our engineers are busy developing the cleaning equipment that tomorrow will be hard at work in towns, cities and factories throughout the world.

**20 years of expertise
and experience keeping your city clean**

Glutton®'s **VISION**

Glutton® provides the **convenience** of **cleanliness** for everyone, improving **safety** in Cities and Industrial Sites around the world.

Glutton® also has a **MISSION**

To invent, develop, and bring new products to the market That make the environment **cleaner** AND **safer** while at the same time **reasserting the value** of human work.

Glutton®'s core **VALUES**

- Quality
- People
- Innovation
- Passion
- Dynamism
- Sustainable development

Glutton®

is sweeping away outdated cleaning systems

Glutton® has many advantages over the shovel and broom:

How do you benefit?

With Glutton® and the same workforce, **your town is five times cleaner** than with classic shovel and broom systems.

Shovel and broom

VS

Glutton®

Low-status image of the street cleaner.

The street cleaning workforce is given status and motivation. The street cleaner becomes a cleaning operative who blends in with the public.

Piles of rubbish are visible.

Glutton® is attractive and stylish. The rubbish goes straight to a standard 240 litre container.

Unhygienic.

No contact with the rubbish. Hygiene is a priority (stainless steel parts, etc.).

Outdated, antiquated system.

Efficient and innovative system.

Time wasted collecting the rubbish.

Time saved vacuuming the rubbish.

Manual labour.

Glutton® takes away the drudgery. Self-propelled and motorised.

Risk of injury while collecting the rubbish (sharps, syringes, broken glass, etc.).

No contact with the rubbish. Working in complete safety.

Some places are difficult to reach.

Glutton® is compact and fits everywhere. Powerful suction in corners and recesses.

Poor visibility, dangerously exposed to other road users.

Good visibility: flashing beacon, headlights, safety lights, reversing alarm, etc.

Presents a poor image of the town's cleaning department.

Presents an excellent image of the town's cleaning department.

Glutton® cleans

to help the city breathe

Glutton®

A unique concept
Any use and any surface

The Glutton® guarantee:
a clean town,
and residents with
a smile on their face

The Glutton® **urban vacuum cleaner** is **mobile, highly manoeuvrable and self-propelled** and can clean up anything that will fit through a 125 mm hose. It is the street cleaning champion.

Industrial waste or urban rubbish – there is nothing it cannot handle: paper, cardboard, cigarette packets and butts, cans and bottles made of glass, plastic or metal, dog waste, dead leaves, rubbish trapped in tree grilles, wood/steel/aluminium shavings, etc.

Glutton® is becoming an indispensable tool for **cleaning towns and cities, industrial sites, pavements, roads, pathways, parks, tree grilles, markets, factories, workshops, car parks, halls, auditoriums, docks, stations, airport, schools, camp sites...** where the broom is increasingly difficult and inefficient to use.

Glutton® Collect® Electric

Where innovation meets cleanliness

Glutton® is an electric urban and industrial waste vacuum cleaner. It is simple, easy to use and extremely effective.

Operators save time and improve productivity without wasting their energy. They can make fast progress, vacuuming the rubbish instantly as they go. Glutton® handles everything: **cigarette butts, cans, bottles, dog waste, dead leaves, wood/steel/aluminium shavings, etc.**

Glutton® enhances the well-being and cleanliness of your town and boosts the status of the work done by your maintenance teams

Glutton® cleans

to help the city breathe

Glutton[®] Collect[®] Electric

is a unique self-propelled waste vacuum cleaner concept designed to keep towns, cities and industrial sites clean.

Characteristics

Battery life 8 to 16 hours depending on use and battery technology.

Compact : W 795 x L 1950 x H 1700 mm.
Adjustable width for all situations (750 / 795 mm).

Weight 395 kg.

Near-silent operation – easier on users and residents.

48 V/1500 W electric motor generating the suction.

48 V/1500 W electric drive generating **forward and reverse** movement.

Variable speed, adjustable by tilting the handle:
between 0 and 6 km/h **forward** and **between** 0 and 3 km/h reverse.

Standard 240 litre container with stainless steel support.

Stylish bodywork made of polyester. The cover is quick to open for access to most components requiring maintenance.

Machine-welded and galvanised chassis (optional stainless steel chassis).

Highly resistant to impact and wear.

Lead-acid batteries (gel batteries available on request).

Battery top-up kit included with the Glutton[®].

Built-in counter showing hours of operation and remaining charge.

Intelligent, hermetically-sealed (IP66) battery charger built into the machine.

The Glutton[®] is very stable and has puncture-proof tyres so kerb heights up to 18 cm up and 20 cm down are no problem.

How do you benefit?

- Extremely powerful for maximum productivity.
- 24 m² filter surface area : the exhaust air is cleaner than the air we breathe.
- Self-propelled and highly manoeuvrable for ease of use.
- Peace and quiet for local residents.
- Very long battery life.
- Respects the environment: 100% electric, no CO₂ emissions.
- Ergonomic and easy to use for complete safety.
- Attractive and stylish: Glutton[®] fits perfectly into the urban environment.
- Reliable and robust for a long service life.
- Excellent quality/price ratio.
- Expert after-sales and a range of useful services.

Find out about the equipment available as standard with the **Glutton® Collect® Electric**

Ultra-lightweight carbon fibre suction pipe

Glutton® has a 125 mm carbon fibre suction pipe that can handle all kinds of waste with maximum efficiency. **Ultra-lightweight**, with a **three-way adjustable elbow support** for ergonomic and comfortable operation.

Anti-clogging grid

The suction system has an anti-clogging grid to prevent blockages caused by plastic bags, dead leaves, etc.

Double soundproofing

for near-silent operation

Glutton® means peace and quiet for local residents.

Dust filter

24 m² filter surface area

The 24 m² dust filter is ISO5011 compliant, trapping 99.96% of particles over 0.5 microns.

That means the exhaust air is cleaner than the air we breathe!

Glove compartment

20 litre lockable storage space:
a secure place for personal items,
gloves, waterproofs, snacks, etc.

Making life even easier
for the operator.

Flashing beacon

The flashing
beacon on top
of the machine
is on all the time for better
visibility on public roads
and greater safety.

Standard 240 litre container

48 V lead-acid battery

Autonomy:
12 to 16 hours

Steerable front wheel

Allowing the machine
to pivot on itself and providing
great manoeuvrability
and 360° turns.

Ambidextrous control arm

Glutton® is really easy to handle thanks to the ambidextrous control arm (left and right-handed).

Emergency stop button and control panel

The emergency stop button is clearly visible on the control panel and it is easy to operate by hand.

- 1 - Emergency stop button
- 2 - Spray switch (option)
- 3 - Charge indicator
- 4 - Discharge indicator/counter showing hours of operation
- 5 - Headlight switch (option)
- 6 - Speed selector
- 7 - Extinguisher lamp (option)
- 8 - Spray lamp (option)

Main switch

For safety reasons, the main switch is located in the **locked** glove compartment.

Other safety features

Audible reversing signal (option) and bell, reflective strips (option) on the container, extinguisher, electromagnetic brake applied if there is a power failure, fuses protecting the power and control circuits, **impeller motor cutoff when the battery is 80% discharged**, machine can be safely freewheeled without the motor.

Puncture-proof tyres

Wheels with industrial-grade tubeless tyres and shielded ball bearings.

Parking brake

For safe parking even on a steep slope.

Bodywork protected by bumper strips

A wide range of useful **options** to meet your needs

Automatic extinguisher

For complete safety – automatically extinguishes a fire starting in the container.

Removable stainless steel anti-clogging grid

The suction system has an anti-clogging grid to prevent blockages caused by plastic bags, dead leaves, etc.

The removable stainless steel anti-clogging grid makes your Glutton® much easier to look after.

Dog waste spray

The Glutton® comes as standard with a booster making it easy to deal with dog waste. To make the process more hygienic and less unpleasant, our engineers have developed an option that your cleaning operatives will love: a special dog waste spray that disinfects, deodorises and humidifies the container.

How do you benefit?

- Constant humidity reduces the fire risk.
- Dust is kept inside the container, reducing the load on the filter.
- Pleasant aroma.

Safety lights

Side and rear LED lights for **maximum visibility**.

Headlight

A specially designed, strong LED headlight can be added for working in the dark and dusk.

Reflective decals

On the container and the bodywork for better visibility.

Reversing alarm

Alerting passers-by and keeping them safe.

Bell

To attract attention if necessary.

Tool holder

To carry your dustpan and broom in case you need them.

Plastic bag kit

Manual grippers

Making it easy to collect various items that are trapped, dangerous or difficult to handle.

Side bin for large items

The bin is within reach without letting go of the handle. Use it for large waste items that cannot fit through the 125 mm pipe.

Litter bin emptying kit

Practical and flexible for waste sorting

The litter bin emptying kit attaches easily and safely to your Glutton®. You can have either **a single 120 litre bag or two 120 litre bags.**

Wheel for sweeping pipe

Available in diameters 50 and 100 mm.

Equipment available **as an option**

Weeding kit

Registered design

Weeds growing between paving stones? Your Glutton® is highly versatile and offers the perfect solution for environmentally friendly weeding.

Our weeding kit is easy to attach to your Glutton® and straightforward to use:

- It removes and vacuums away weeds in a single operation.
- It also cleans away the soil and seeds, reducing the risk of regrowth.

How do you benefit?

- Effective weeding solution without using chemicals.
- Quickly attaches to the end of the suction pipe.
- Effective and lasting results.

Patented ergonomic handle 3.0

NEW

Wireless
technology

Also available as an option is the **wireless handle** developed by Glutton® engineers in collaboration with a team of ergonomic designers.

Ergonomic

Innovative multi-position shape
(**registered design**)

Perfectly balanced

Lightweight

Exceptional user comfort

Quickly adjusted without tools

NEW:
With support strap
for freedom of movement.

Reliable

Suction power controlled wirelessly

Robust

Maintenance-free

Multifunctional

One or two hands:
> Comfort position
> Intensive position

Ambidextrous

Glutton® cleans

to help the city breathe

Coolbox

Tree grille nozzle and claw

Narrow nozzle measuring just 2.5 cm with claw for tree grilles. At last you can keep your tree grilles clean!

The nozzle is easy to attach to your Glutton® and does the following:

- Cleans narrow spaces or behind tree grilles, gutters, vents, drains, protective grilles, etc.
- Cleans away rubbish trapped in the gaps.

You can use the claw to deal with stubborn or trapped items.

How do you benefit?

- A simple and effective solution for cleaning tree grilles.
- Quickly attaches to the end of the pipe.
- Conveniently stowed on your Glutton®.

Wide floor nozzle for industries

Making you Glutton® even more effective and versatile

- The wide floor nozzle means you can now use your Glutton® in workshops, warehouses, exhibition halls, etc.
- It easily cleans away wood/steel/aluminium shavings, fabric offcuts, cigarette butts, dust and particles on smooth floors and surfaces, etc.
- It has four castors making it highly manoeuvrable and comfortable to use.
- It is very easy to attach to the suction pipe on your Glutton®.

How do you benefit?

- **Cleanliness and hygiene:** Glutton® is your company's well-being partner.
- **Safety:** Glutton® has strong passive and active safety features.
- **Value creation:** Glutton® revolutionises your maintenance services and helps you achieve your goal of excellence.
- **Cost-effectiveness:** With Glutton® your workforce is at least five times more productive compared to manual cleaning.

Two cleaning modes:

With the pipe

For all rubbish that can fit through a 125 mm hose.

With the wide floor nozzle

To pick up shavings, fabric offcuts, cigarette butts, dust, metal filings and other fine materials.

Gel batteries (maintenance-free)

Top-up tank with electric pump

The ideal solution for topping up your batteries.

Stainless steel chassis

Machine-welded stainless steel for maximum mechanical strength and electrochemical resistance.

Container volume reduction kit

Reduces container volume from 240 litres to 120 litres.

This size is compatible with waste disposal openings.

Equipment available **as an option**

Coloured bodywork and/or customised stickers

USB 'Get Plugged'

Stay in touch when you're out and about

The Glutton® USB connector is an easy way to recharge your mobile without affecting the way the Glutton® works.

GPS-ready

Integrating your Glutton® with your GPS platform

Our GPS interface box regulates the voltage and isolates the signals sent to your GPS tracker. This solution maximises security for the batteries in your Glutton® and for your GPS trackers.

Our GPS interface board has a 12 V power supply so it is compatible with most GPS trackers available on the market.

the available options? Contact us

Glutton® Filter Cleaner

100% automatic

You filter is ready to use again after five minutes

The Filter Cleaner is a quick and practical way to clean the filter in Glutton® waste vacuum cleaners. It is 100% automatic and does not release any dust into the atmosphere. The Filter Cleaner is installed on castors so it is very easy to move.

Characteristics

All dust collected into a bag. Registered design.

Clean and safe.

Works independently, connects to a standard socket.

The cleaning process completes in **five minutes**.

Compact and manoeuvrable.

How do you benefit?

- Saves time.
- Improves efficiency.
- Easy to use and fast.
- High suction power.
- Kind to the environment: no dust released into the atmosphere.

Glutton[®] Academy

Training seminars for technicians and users

To guarantee that your Glutton[®] is **properly maintained** and that you make **the best use if it**, we recommend our training seminars for technicians and user.

These are enjoyable, all-inclusive training days, where learning is hands-on and fun. They are set up to encourage interaction so you'll be able to network with colleagues from other towns. They are always a big hit. That's why we think you should sign up your technicians and users straight away.

Let our Glutton[®]
experts train you.

Signing up to our training session is an investment that will definitely pay dividends.

Trainees will benefit from our technical expertise and our wealth of experience in the field.

Contact your Glutton[®] distributor.

Anything else?

A comprehensive technical folder is given to each trainee. A certificate of attendance is presented at the end. You can include these days in your employees' training plans.

Glutton® trailers

Save time and make life easier...
...use our custom-built trailers to transport your Glutton® easily and safely

Whatever your needs, we have a solution:

To transport 1 Glutton® & 2 containers –
(Maximum permissible weight 750 kg)

To transport 1 Glutton® machine –
(Maximum permissible weight 750 kg)

To transport 2 Glutton® machines –
(Maximum permissible weight 1300 kg)

To transport 1 Glutton® & 2 containers –
(Maximum permissible weight 1300 kg)

Trailer **Type 750 kg**
for transporting 1 Glutton® and 2 containers

Technical characteristics

Internal clear dimensions:
L 2.75 m x W 1.28 m x H 0.39 m
Maximum permissible laden weight:
750 kg
Unladen weight: 280 kg
Braked axle, 750 kg
3x 155/13 wheels (1 spare)
Supplied with wheel clamps
for safe parking on a slope

Two rear corner steadies
Supplied with three straps to secure
the Glutton® and the containers to
the trailer
The floor has positions for the wheels
of the Glutton®, for easier loading,
unloading and lashing
Trailer 100% hot dip galvanised
Lights and indicators

How do you benefit?

- Stay safe when transporting your Glutton® and containers
- Towable by a «light» vehicle
- A jockey wheel on the drawbar makes parking easier
- The trailer is supplied with the straps needed to secure the Glutton® and the containers
- Non-tipping trailer. The expanded metal tailgate acts as a loading ramp, for safe loading by one person
- Floor made of non-slip marine plywood

Trailer **Type 750 kg** for transporting 1 Glutton®

Technical characteristics

Internal clear dimensions:

L 2m x W 1.25 m x H 0.39 m

Maximum permissible laden weight: 750 kg

Unladen weight: 220 kg

Unbraked axle, 750 kg

3x 155/13 wheel - one of which is a spare
wheel fixed to the right-hand side of the trailer

Chassis and parts hot dip galvanised

2x 48 mm rear corner steadies with clip

2 PVC wheel clamps

150 mm metal rear ramp

6 lashing rings fixed to the floor
(3 on the left and 3 on the right)
to secure the Glutton® for transport

Lights and indicators

How do you benefit?

- Stay safe when transporting your Glutton®
- Towable by a «light» vehicle
- A jockey wheel on the drawbar makes parking easier
- The trailer is supplied with straps to secure the Glutton®
- Non-tipping trailer. The expanded metal tailgate acts as a loading ramp, for safe loading by one person
- Floor made of non-slip marine plywood

Trailer **Type 1300 kg** for transporting 1 Glutton[®] and 2 containers

Technical characteristics

Internal clear dimensions:

L 3 m x W 1.76 m x H 0.97 m

Maximum permissible laden weight: 1300 kg

Unladen weight: 440 kg

1600 kg brake head with parking brake,
coupling and plug support

3x 185/14C wheels, one of which is a spare wheel

Supplied with wheel clamps for safe parking on a slope

2 rear corner steadies with cranks allowing the Glutton[®]
to be loaded and unloaded without the trailer being hitched
to a vehicle

The trailer floor is made of non-slip marine plywood
for excellent adhesion

The floor has positions for the wheels of the Glutton[®],
for easier loading, unloading and lashing

Equipped with two large, lockable storage boxes with space
for two dust filters, one tool box, one fuel can, etc.

Includes dustpan and broom holders

Trailer 100% hot dip galvanised

Lights and indicators

How do you benefit?

- With this large trailer you can transport one Glutton[®] and two extra containers, making three containers in total, enough for a whole day even with large amounts of rubbish
- Stay safe when transporting your Glutton[®]
- A jockey wheel on the drawbar makes parking easier
- Supplied with three straps to secure the Glutton[®] and the containers to the trailer
- Non-tipping trailer. Two expanded metal tailgates act as loading ramps, for safe loading by one person
- Floor made of non-slip plywood

Trailer **Type 1300 kg** for transporting 2 Glutton[®] machines

This trailer is unable to carry extra containers

All the other characteristics are the same as
for Type 1300 kg - 1 Glutton[®]

**Please get in touch to find out
